

# RAMAGYA ROOTS

A Unit of Ramagya Group

A Curriculum Inspired by  
Finnish Pedagogical Approach

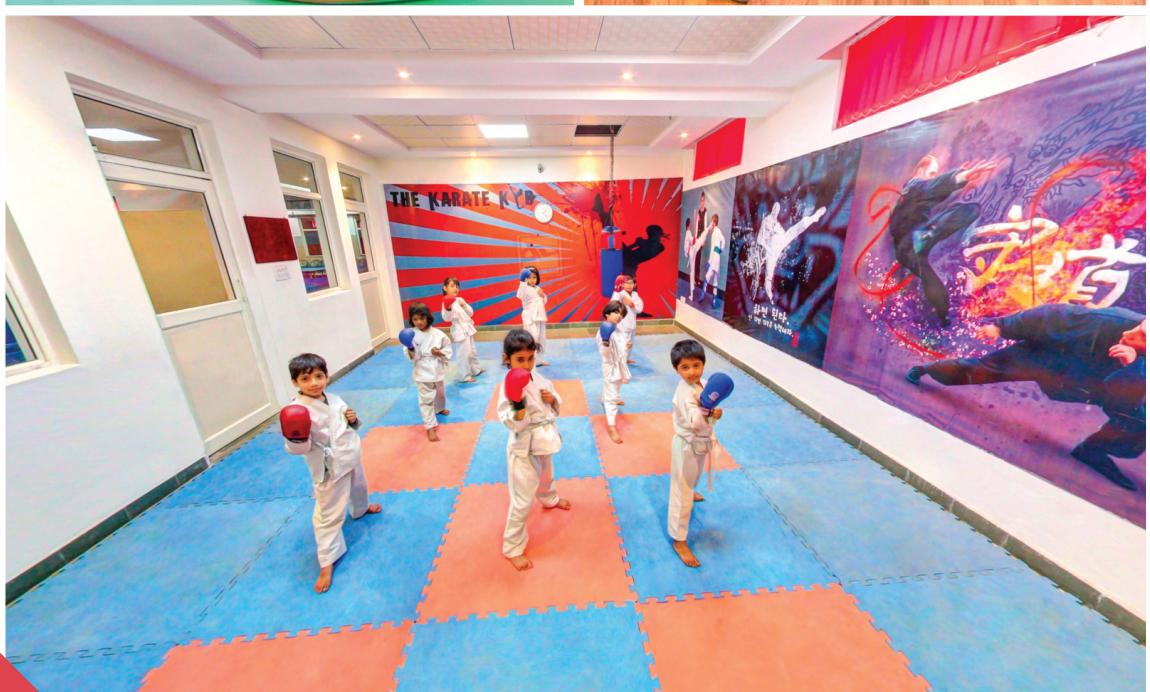

# “IT'S ALL ABOUT THE KIDS”

Ramagya Group of Schools has dedicated 15 yrs towards bringing quality in education. In the endeavour to match international standards in overall development, we have implemented curricular and co-curricular strategies that are backed up with research. A child's first step in Ramagya family ensures his / her readiness for future challenges.

With a team of efficient and globally dedicated educators, state-of-the-art infrastructure, we provide learning spaces that unfold the varied potentials and hone them to perfection.

The unparalleled service of Ramagya Group holds today a position in the top 5 senior secondary schools in Delhi / NCR, besides being ranked amongst the top 30 Great Indian Schools by Forbes India. Ramagya Roots is amongst Top 10 Schools in Delhi- NCR.

## WHY RAMAGYA ROOTS?

Ramagya Roots have been nurturing children for over 15 years, it is considered to be the only pre-school in NCR that offers Finland based global curriculum CORE- Curriculum of Ramagyan's Eminence'. Our belief system is based on the idea that every child has a unique set of strengths and hence, we aim to build and develop each child by providing them with the utmost attention. Our curriculum is a combination of playful and fun activities that allow children to explore and learn something new every day.

# OUR UNIQUE FEATURES:

## MULTI-SPORTS KID FIT PROGRAMME

We strongly believe that a healthy mind operates in a healthy body, and to make this possible, Ramagya Roots have collaborated with Sporty Beans by Yuvraj Singh, which primarily focuses on developing a child with the help of sport-related activities in their early stage. This programme will allow the kids to work on their fine and gross motor skills. In this programme, the focus point is to develop confidence, concentration, social collaboration, sportsmanship value and other life skills in a safe and cheerful atmosphere through sports like, Soccer, Baseball, Basketball, Volleyball, Golf, Tennis, Cricket, Rugby and Hockey.

## BAAL SATHEE (HEALTH BENEFITS PROGRAMME)

This pioneering initiative is taken by Ramagya Group in order to ensure the physical, emotional and psychological fitness of all its students. In this programme, highly qualified counsellors interact with children in person to address their shared concerns, carry out health check-ups, plan diet charts and help them deal with anxiety. The ultimate aim of this revolutionary programme is to help each Ramagyan become a strong individual and transforming them into great leaders of tomorrow!

## TEACHER'S TRAINING

The role of a teacher is extremely important in laying a strong foundation for the children. Thus, we at Ramagya Roots, provide regular training and workshops to our teachers. They are also sent to foreign countries, to get training as per the global standards so that they can learn and help the school to transform into a creative place of learning.

## HANDS-ON EXPERIENCE TO PARENTS

This allows the parents/guardians of the children to experience the curriculum and have deeper insights into the growth and development of their children. Also lets the parents to learn about the strengths and passions of their children.

## SAFETY & SECURITY

Security and Safety are given utmost importance at Ramagya Roots. When it comes to transport, safety is ensured through GPS enabled transport, AC buses are fixed with GPS, VTS system is also fitted which secure the safety of all the routers. The system provides regular notifications/messages to the parents or guardians from the time their children are picked up until they are being dropped to their respective locations.

## FOCUS ON MULTIPLE INTELLIGENCE

Latest technology namely, 'Dermatoglyphics' is used to understand the innate potential of the child. Through this technology, we are able to work on the progress of the child by helping him/her achieve their optimum potential and give guidance in the right direction.

## E-LEARNING

With the changing world, the classes at Ramagya roots are digitized with enriching content modules and workshops. We have made sure that these modules become an integral part of education and ensure the conceptual understanding of every topic.

## 3D LAB

Ramagya Roots is the only school that provides full suite 3D lab for pre-primary classes. This unique learning experience makes the classes more fun, easy and engaging for our children.

## RESEARCH & DEVELOPMENT

There is a dedicated team of researchers, scholars, and teachers keep up the pace with the latest trends and ensuring that teaching pedagogy is given serious attention by our team of researchers. Due to which we keep introducing new and unique ways of learning in the curriculum.

## MOTOR-SENSORY EXPLORATION ROOMS & MONTESSORI LEARNING CORRIDORS

A child-oriented approach for education is used which is based on the best practices of Maria Montessori and Howard Gardner. This approach creates a perfect balance when it comes to a child's natural interests and the activities that are available. As children can learn through their own experience and observations, through this method they would be able to learn at their own pace as well. They have the freedom to respond any moment when there is an existence of natural curiosity or questions. This will build a strong foundation for life-long learning.

## ► CHAIRMAN'S MESSAGE

### “WISDOM BITES FROM DREAMERS AND DOERS,,

You see things; and you say, 'Why?' But I dream things that never were;  
and I say, 'Why not?' ————— **GEORGE BERNARD SHAW**

This, in a nutshell, summarizes the journey of Ramagya School from its modest beginning about quindecennial years (15 years) ago to its present state. Every great idea begins with a dream but if we have within us the strength, the patience, and the passion to reach for the stars to change the world, we can accomplish that task at hand. We planned to provide opportunities to young learners where they can have opportunities to explore and optimize their potential to be at par with their contemporaries and also have that same international feel and standard. This idea led to the establishment of nascent academic beginning as we not only dreamt and planned but also believed that when we summon the will, our dream will surely become inevitable. It required a lot of perseverance, passion, stamina, determination, dedication, self-discipline and efforts to turn the seedlings of a dream into the present reality.

Although the journey of accomplishments has started for Ramagya Group of Schools it's merely the beginning. The transition from a singular school to the group of schools has become possible only because of team work that was accompanied by hard work and integrity of purpose. This single-minded effort has helped us in attaining what we have set as our vision and mission i.e. providing education with international standards.

I would like to express my sincere gratitude to the Principals of the various branches of Ramagya, HODs, Teachers, Parents and Communities who have overcome all the obstacles with an exalted sense of purpose to provide a progressive and holistic education that moulds character, enriches the mind and imbues a thirst of exploration in the learners. Success is thus the result of perfection, hard work, loyalty, persistence, the joy of achievement and the thrill of creative effort but before we rest on our laurels and glories there are miles and miles to go.....

**DR. SANJAY GUPTA**  
**CHAIRMAN**

**RAMAGYA GROUP OF SCHOOLS**

## DIRECTOR'S MESSAGE

“LEARN, BELIEVE & ACHIEVE AS A LIFELONG LEARNER IS A LIFE LONG WINNER. ”

MATSHONA DHLIWAYO

We at Ramagya believe in what – UNICEF believes about education that it should help young people develop life-skills as the life-skills have potential of transforming lives of the learners so our constant endeavour is to hire character and train the consequent skill. Education of today has a twin purpose – firstly, it should teach us to make a living and secondly, to teach us to live independently. Therefore, learning how to learn is one of the most important life- skills and at Ramagya we emphasise that child must be taught how to think and not what to think. Such skills will equip our students to have a better tomorrow.

We believe that education is not to reform students or amuse them or to make them expert technicians but it should widen their horizons, inflame their intellect and teach them to think lateral thus making education a lifelong process.

Parental involvement is a part of the mission of our school. Connecting home and school makes Ramagya a global educational community making it imperative to tear down the wall between parents and school.

Integration of academics with life- skills and opportunities is what we aim for our students at Ramagya. Such openings will make our students accomplish their most cherished dreams of life and be efficacious and contented individuals.

I would like to take this opportunity to appreciate the team of academicians, mentors and all those who have supported us in building and establishing Ramagya Group as one of the premier educational institutes in Noida and NCR. It is said that “the winds and waves are always on the side of the alert navigators, so let us prove our mettle to make every wind and wave favourable to us.”

MRS. RAJNI GUPTA

DIRECTOR

RAMAGYA GROUP OF SCHOOLS

## MANAGING DIRECTOR'S MESSAGE

“  
THERE IS ONLY ONE CORNER OF THE UNIVERSE YOU CAN BE  
CERTAIN OF IMPROVING, & THAT'S YOUR OWN SELF  
”

Ramagya, within a very short span of time, has emerged as one of the top 30 schools of India and aims to be among the top 10 in the upcoming years. Ramagyans believe in providing the best facilities to our students from the best resources available around the world. Our collaborations with the best universities in the world have provided an international platform for a wide exposure to our students.

Today, we enjoy a track record of unparalleled results. And with the exponentially growing demand from students, it's time for us to move a step closer to them.

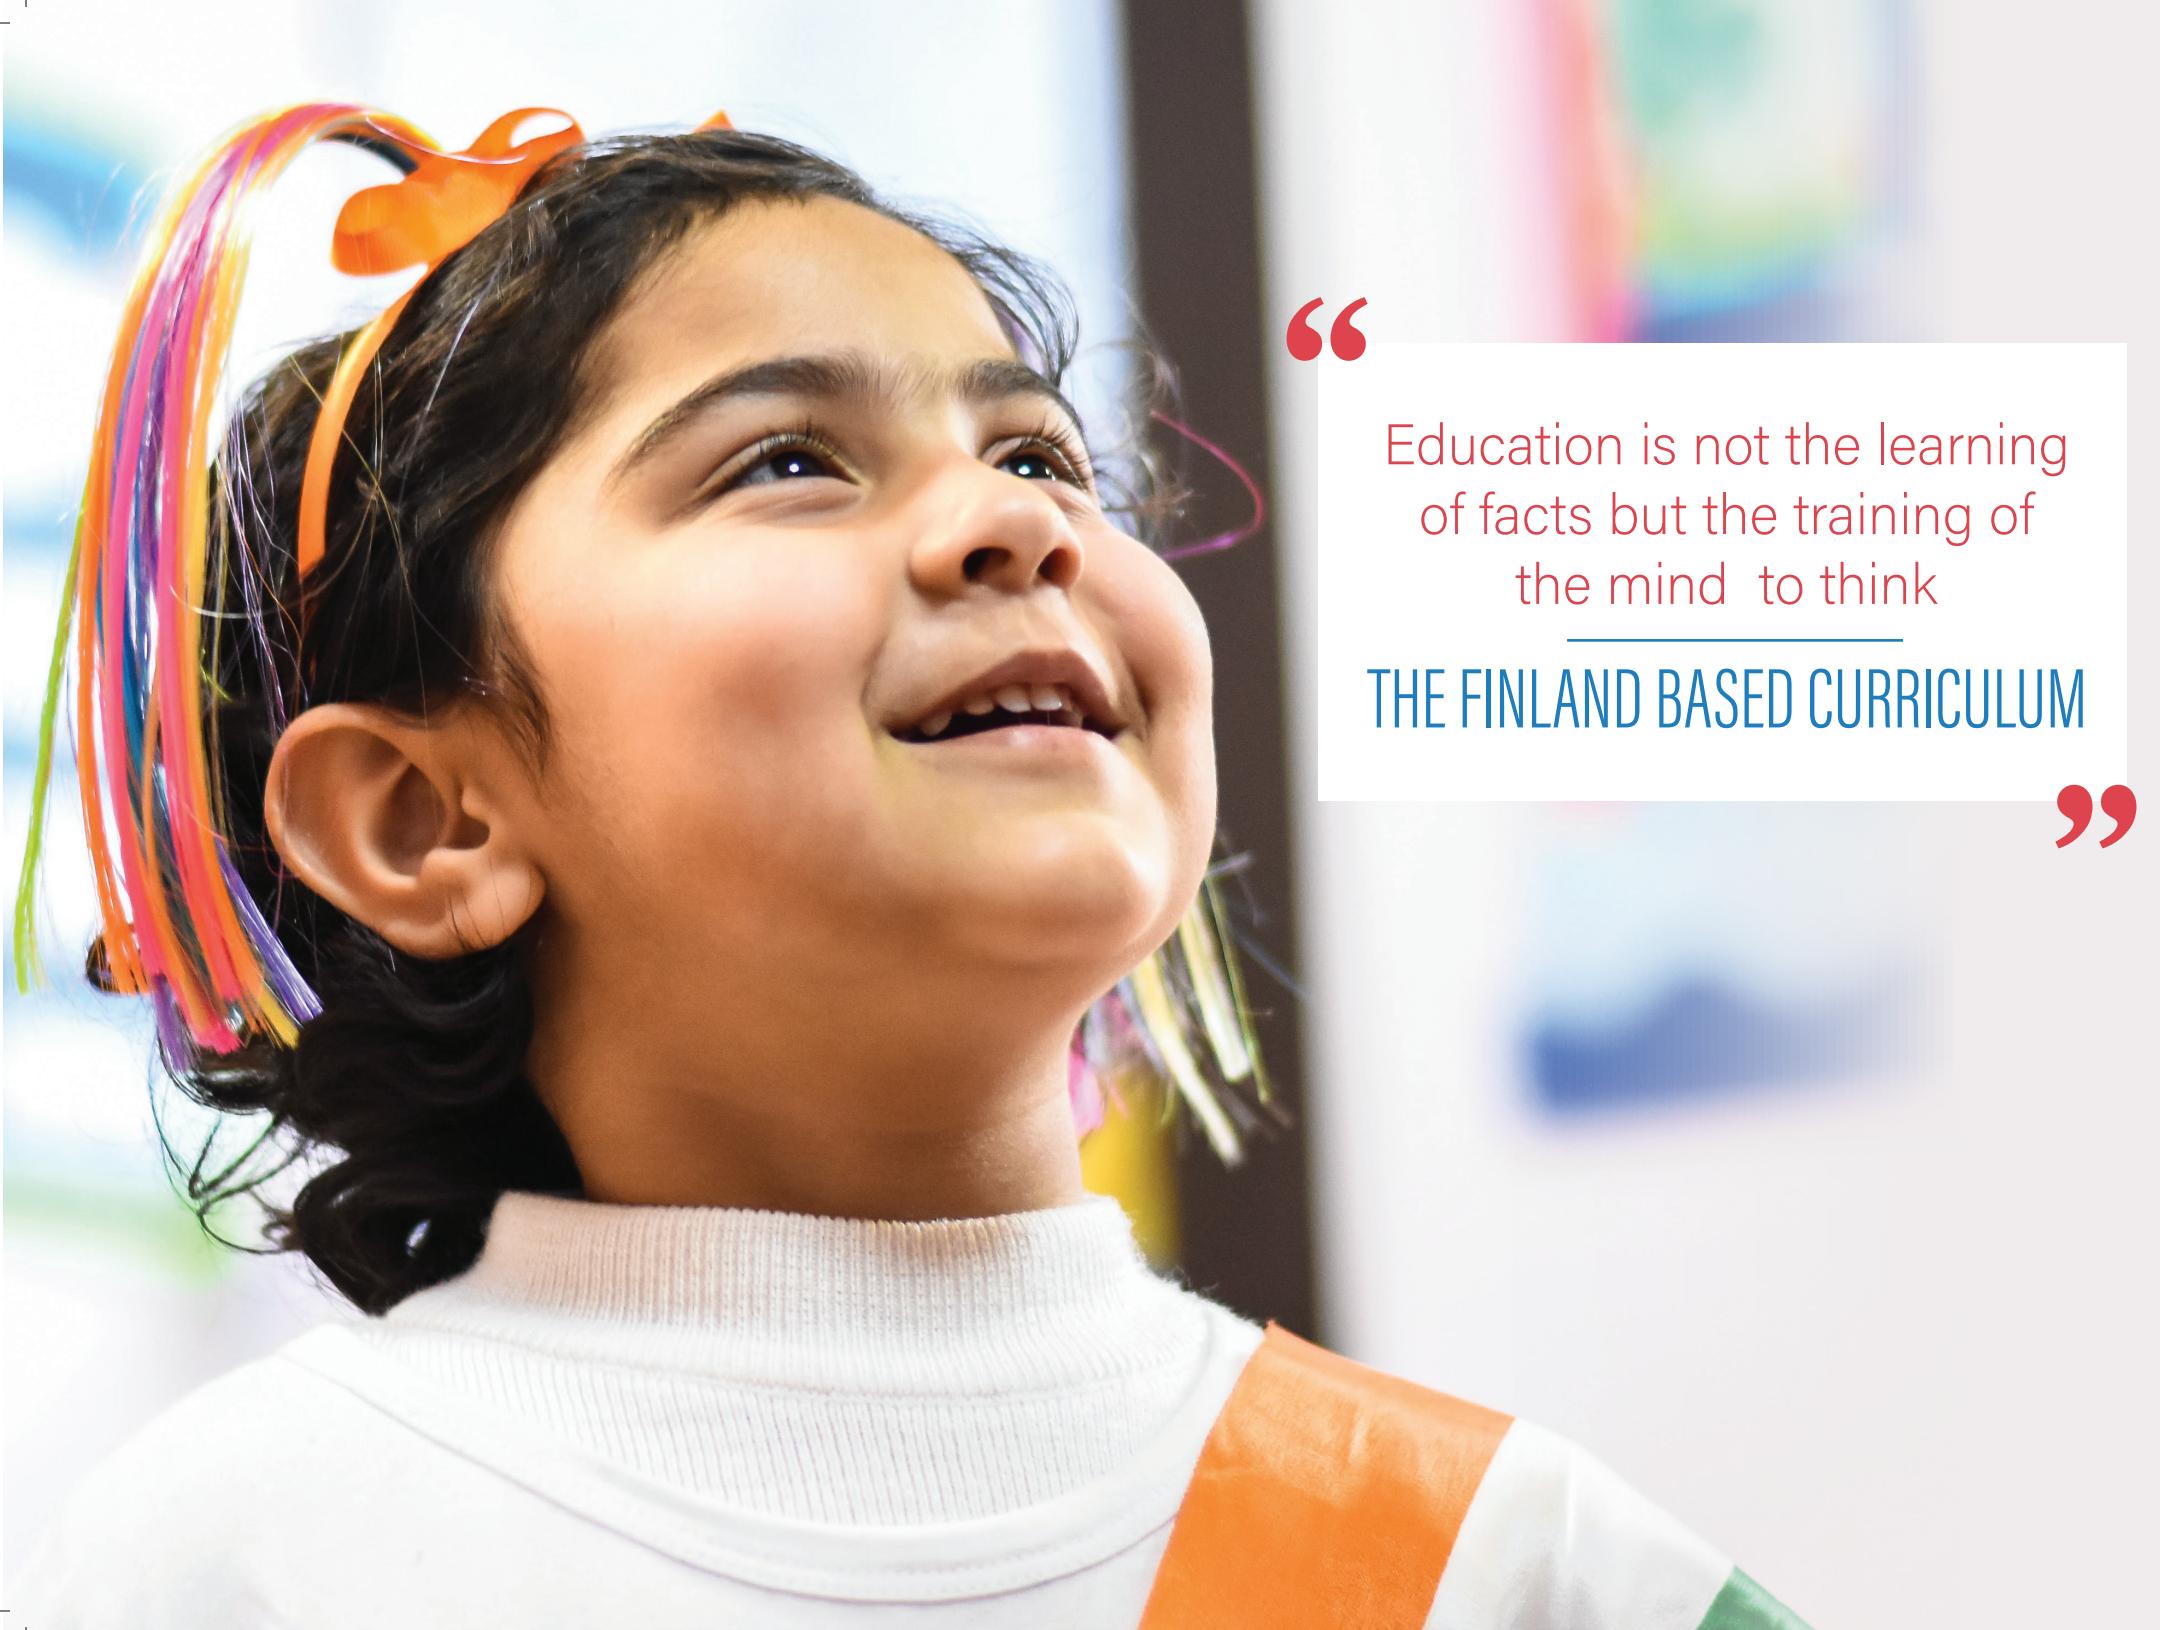

Needless to say, the endeavour to nurture and even further enrich the quality of education will be our constant focus. As for the rest, we will have constant changes, undoubtedly for the better. Education is the basis of the entire civilization and hence it is important that the ones who impart education, to be the masters of their domain, where they lead the students into. At Ramagya, we follow an uncompromising and unwavering commitment at recruiting the finest educators for our students to give them an edge in a fiercely competitive world.

In order to experience the satisfaction and enjoyment of success in life, a definite goal is essential. To prove it attainable, its image needs to be honed continually so that it stands out vividly in the thoughts for climbing the ladder of success. Organised and definitive objective forges up into strong motivation to attain the goal.

MR. UTKARSH GUPTA  
MANAGING DIRECTOR

RAMAGYA GROUP OF SCHOOLS

“

Education is not the learning  
of facts but the training of  
the mind to think

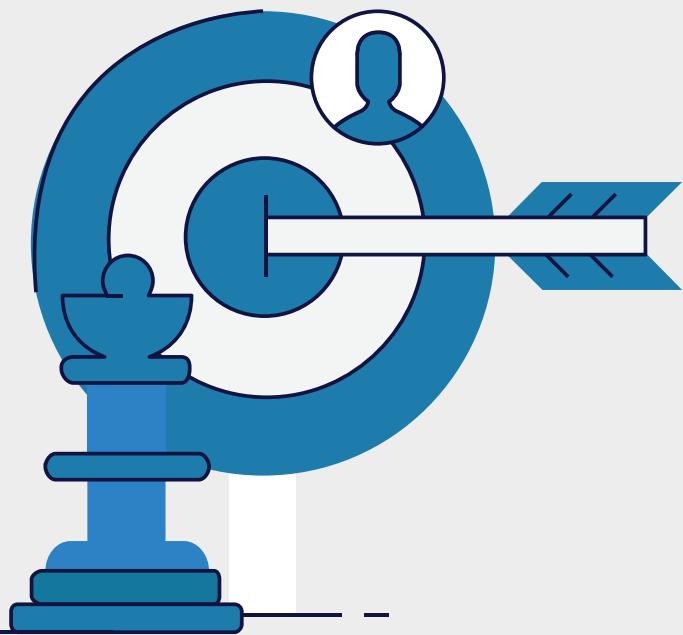

THE FINLAND BASED CURRICULUM

”

# MISSION & VISION

## MISSION

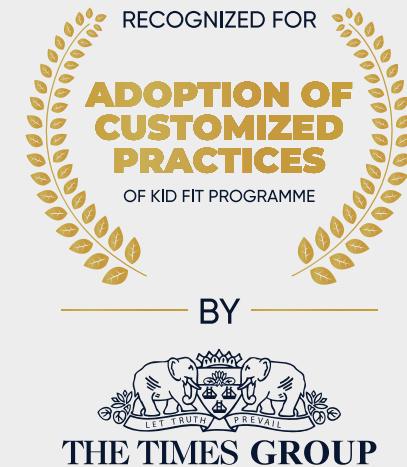

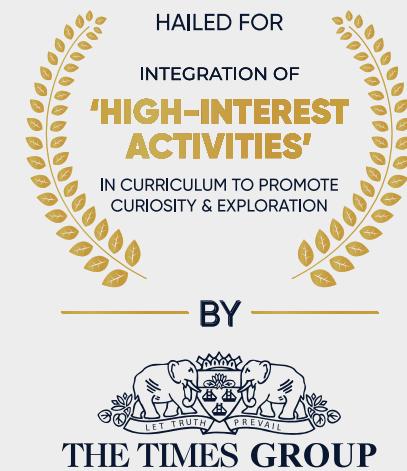

To establish a World Class Center Of Learning by delivering an educational experience that engages students intellectually, creatively, physically, spiritually and socially to transcend all barriers and work in unison to bring about a positive change in society. The school aims at basing the entire civilization on Education and at providing the best resources available from the best facilities around the world. For satisfaction and enjoyment of success in life, a definite goal has been set to attain. We endeavour to nurture and enrich the quality of education imparted to Ramagyans.

## VISION

To infuse deep-rooted values in our children that nurture generosity, selfless, responsible and global citizens ready to shape a better world.

# ATTAINMENT & ACCOLADES

“ FIRST THE EDUCATION OF THE SENSES,  
THEN THE EDUCATION OF THE INTELLECT. ”

-Maria Montessori

# PROGRAMS

## TODDLERS

1 year 5 months  
and above

Our Toddlers enjoy safe and protective surroundings to explore new abilities.

## PRE NURSERY

2 years 5 months  
and above

Children at this age make great development studies and our program focuses on creating consistency and routine.

## NURSERY

3 years 5 months  
and above

Children are engaged in problem-solving conflict managing and self-regulation.

## KINDERGARTEN

4 years 5 months  
and above

The program gives ample academic challenges that will leave your child well prepared to transition into elementary school life.

## DAY CARE

Age appropriate activities to promote social and cognitive skills of a child.

# CORE

Taking a big leap forward in imparting world class education to the tiny tots, Ramagya Roots has introduced a new Global Curriculum 'CORE', based on Finland's best teaching practices. While 'CORE' stands for Curriculum of Ramagyan's Eminence, it offers the children a more collective approach to learning with the aim to discover and nurture each child with individual attention. Further, 'CORE' at Ramagya Roots, combines playful curiosity and freedom for exploring with deep scientific understanding about how children learn. The curriculum places a heavy emphasis on "joy" and it reiterates that "play" is a very efficient way of learning for children.

Warm nurturing environment supports our inquiry and play-based approach, ensuring every child develops the knowledge and skills needed for future academic success. Through CORE, our simulative & creative curriculum support, the personal potential teaching instructions cater to each student's needs, abilities and learning styles, resulting in a community of happy, confident and engaged learners.

# CORE SPECIAL FEATURES

## GLOBAL THREAD FOR GLOBAL PERSPECTIVE

I am because you are: People are through people.<sup>1</sup> The global thread of CORE is based on this philosophy, through which we aim at bringing greater awareness amongst our learners towards the importance of community: Ones own culture, and other cultures; their differences and the similarities. Global thread of CORE aims at teaching kids that success is intrinsically linked with our fellow human beings.

Learning beyond the class desk. Ramagya offers a platform to the kids where they learn by doing. Experiential Learning enables learning beyond the classrooms and independent strategies are age relevant and help the learners to associate learning to real life experiences through the sea of opportunities offered to them beyond their classroom desks.

## PARENTS SEGMENT

CORE has specific elements specially developed to have a community of informed and active parents. Surveys across the world show that informed parents lead to a beneficial effect on academic achievement and long term outcomes of students' results. The dedicated and customized parents segment of CORE has details and references for the parents for understanding the classroom teaching so that the learning can be taken up beyond the classrooms.

## PATH TO EXCELLENCE

CORE offers a paved path of success through its worksheets that are designed with a purpose that goes beyond being a tool for written assessment. Each worksheet has a preset learning objective provided with a set of supplement worksheets which prove to be a boon for the learners. It helps the students to- refine, revise, practice and retry.

## DISCOVERING AND EXPLORATION

Our KG learns in a dedicated kindergarten wing, where classrooms are designed with great care and spill out into learning pods. These learning pods are large, open, shared spaces, where teachers set up hands on learning centers and other learning spaces that foster skill development. This includes a junior library, STEM, KG Aquatic Complex and an outdoor discovery centre.

“

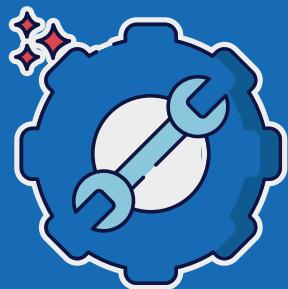

A DIFFERENT EDUCATION WHERE  
LEARNING HAPPENS  
BEYOND BOUNDARIES

”

# CURRICULUM

At Ramagya Roots we encourage inclusive progress, knowledge, development and well-being of children and offer an underpinning for improvement in their complete growth. We believe in identifying each child holistically and aim to teach socially, emotionally and academically poised children. As every child has a unique set of intelligence, we have planned an age-appropriate curriculum founded on the Multiple Intelligence Theory. This allows the child to develop in with all respect, without changing the child capabilities and strengths. The activities and exercises in the curriculum include the children to operate, explore, and experiment with real objects. Considering play as an important part of their development. Our drive is to plant seeds in the lives of children and cultivate them to make their ROOTS strong for life.

“**OUR PURPOSE IS TO PLANT SEEDS IN THE LIVES OF CHILDREN AND NURTURE THEM TO MAKE THEIR ROOTS STRONG FOR LIFE.**”

## MOTOR DEVELOPMENT

Acquiring motor skills is just one part of children's development. Mastering both fine and gross motor skills are important for children's growth and independence. Having good motor control helps children explore the world around them and also helps with their cognitive development.

## LANGUAGE DEVELOPMENT

Language development is about encouraging kids to network on the basis of language. In other words, developing all diverse behaviours in which a child understands and interacts socially. We aim to help kids to improve their speaking and writing skills. Communication and language development are noteworthy because communicating is an essential element of fine motor skill progress and an image of cognitive development. Ramagya Roots injects exercises and activities involving communication and language development in a manner which has a strong foundation. Activities related to stimulating the development of this category comprises of Vocab building, Storytelling, Picture Reading, etc.

## CREATIVE DEVELOPMENT

Creative, play and artistic activities have a central role in toddlers' learning and development. They help nurture imagination, and also develop problem-solving, thinking and motor skills.

## SELF ENHANCEMENT

When children practice self-help skills such as feeding and dressing themselves, they practice their large and small motor skills, gain confidence in their ability to try new things and build their self-esteem and pride in their independence.

## REFLECTIVE & EXISTENTIAL DEVELOPMENT

The emphasis is put on developing capability, self-reflection, and meta-cognition or an understanding of one's own learning process. Philosophy with Children seeks to create a place and space for active engagement in philosophical thought that promotes broad, critical thinking skills.

## SOCIAL DEVELOPMENT

Developing social skills and interacting with the world is a critical part of growing up. Social skills are ways of dealing with others that create healthy and positive interactions. Children who have social skills can communicate clearly, calmly, and respectfully.

# KEY FEATURES

## SOCIAL DEVELOPMENT

Social development includes children's aptitude to network with people and regulates their own actions according to the situation. Such a development of one's psyche in their early childhood is determined by the person's well-being, overall health and happiness. It is meticulously connected to cognitive and emotional factors, and together these growth markers and milestones create a strong foundation for the development of healthy relationships. However, Ramagya Roots believes a child must be given a thorough understanding of handling stressful situations and other skills to develop socially. Our program involves various fun activities that allow the child to develop in all dimensions.

### ROLEPLAYS

In this early phase of education, children learn the most important and basic life teachings and what is better than a roleplay? For this, Ramagya Roots involves kids in activities like fairy tale plays, tea party, camping, etc., which are not only fun but also give the kids an idea about basic social interactions.

### SCHOOL VISITS

Children can get extremely comfortable and friendly with their classmates, and sometimes interacting with the same set of peers can put a pause on their social development. In order to allow kids to keep growing socially, we involve them by taking them to different schools where they can meet new kids of their age and use their learnings to interact with them.

### INTERACTIVE LEARNING SESSIONS

Kids acquire knowledge by collecting information and processing it by resolving difficulties and speaking what they have understood. For this, we allow the kids to take part in activities like storytelling or puppet show so that they can articulate their learnings and feelings.

### THEMED CLASSROOMS

To keep the fun element in the curriculum and help the kids start their day with a surprise, we decorate the classrooms with themes like ocean, flowers, etc. These theme-based learnings build their excitement and curiosity in their learning process.

### STIMULATING CLASSROOM ENVIRONMENT

A stimulating classroom environment is built by combining activities that involve movement, illustrations, multi-modal education, and higher-order thinking/questioning. Ramagya Roots blends all these activities which develop their overall social skills.

### MULTI ACTIVITIES WORKSHOPS

Ramagya Roots provides exposure to the kids to a variety of skill-based workshops in various fields like creative arts, science, theatre or music, etc. Such activities will help them mature into a well-rounded character and a stable attitude towards life.

## COGNITIVE DEVELOPMENT

Cognitive development in an offspring comprises advanced construction of learning skills, like, courtesy, memory retention and intellect. These vital skills permit children to process sensual data and ultimately acquire an understanding to evaluate, examine, recollect, make judgements and comprehend cause and effect. Even though this cognitive development is connected to a kid's hereditary, but most cognitive skills can be learnt. In other words, these cognitive skills can be enhanced with the right kind of training. To achieve this, Ramagya Roots takes an initiative to build a prospectus in which activities involving cognitive skill development of a child is prioritized. Such exercises include:

### PUZZLES

Solving puzzles is not only a workout for a kid's mind but it also tests how their mind thinks. As children mature, solving puzzles have various benefits like problem-cracking skills, color-letter awareness skills and fine motor progress.

### IDENTIFYING PICTURES, SHAPES AND COLORS

Color and shape are common ways through which children perceive and classify what they observe. These identifiable features boost kids to describe and form the diverse world around them. We help to stimulate such skills by a variety of fun activities like tracing or drawing shapes, grouping similarly-colored objects, etc.

## **MOTOR-SENSORY EXPLORATION ROOM**

A child develops two type of motor skills namely, fine motor skills and gross motor skills. Exercises like shoe-tying, buttoning, running, walking, etc. are involved in the program so that they can develop both these motor skills.

# **COMMUNICATION & LANGUAGE DEVELOPMENT**

Communication and language development is about helping the kids to develop and encourage them to interact on the basis of language. In other words, developing all different ways in which a child comprehends and communicates and the only part of this is by speaking words in a particular language. Communication and language development is significant because talking is an essential element of fine motor skill progress and an image of cognitive development. Ramagya Roots injects exercises and activities involving communication and language development in a manner which has a strong foundation. Activities related to stimulate development of this category comprises of:

### **VOCAB BUILDING**

Such skills are established by helping the kids by involving them in activities like practising rhymes, reading together, role-playing, etc.

### **STORYTELLING**

As part of the unit, children are asked and encouraged to share their own storytelling flairs, apply the methods of storytelling, form storytelling guides, and perform the story in the classroom.

### **PICTURE READING**

Picture Reading is a vital instructive tool at Ramagya Roots. This activity is a great way to shape literateness, including listening skills, vocabulary and comprehension in children. And it is one of the most loved activity by kids!

### **PHONICS BASED LANGUAGE DEVELOPMENT**

Phonics is a terrific way and a contemporary method used that helps children with reading and writing with the help of sounds. For example, activities related to this technique like, spell-a-thon, flash cards, letter hopscotch, etc. are part of the unit.

# **HEALTH & SECURITY**

### **EXTENSIVE MONITORING THROUGH CCTV**

Keeping them safe.. today, tomorrow and everyday....

At Ramagya Roots, we believe as in charge of the welfare of kids it is our utmost responsibility to ensure a safe and secure environment for them. All the classrooms, lobbies and other spaces have CCTV cameras installed that help in monitoring every little activity of the tiny tots.

### **CHILD SAFE FURNITURE & INTERIORS**

Prevention can eliminate injuries!

The interiors of the classrooms have been done with keeping the kids' security in mind. From installing safety latches on cupboards and doors to furnishing the spaces with childproof furniture pieces that have no sharp ends and are less likely to cause any injury.

### **SAFE SCHOOL CERTIFICATION**

Every student is entitled to have a safe and secure environment where he/she should be treated equally and should not face any form of discrimination. This is due to these measures that we take for kids safety that we have been acknowledged with the Safe School Certification.

### **FIRST AID & EMERGENCY SERVICES**

We are always prepared.... just in case!

The staff members of Ramagya Roots are well trained and have a good knowledge of emergency childcare first aid. Also the first aid workshops are been organised for them on regular interval of time to help them understand the services better and be more responsive in need of emergency.

### **BAAL SAATHEE PROGRAMME FOR HEALTH & MIND DEVELOPMENT**

Baal Saathee is a students health benefit program that works for the betterment of mental and physical health of students. From monitoring their mental and physical health to providing the solutions with the right diet plan and maintaining health records, Baal Sathee covers all.

### **SECURITY GUARDS**

A team of dedicated security personnel is always stationed in and around the school premises to ensure kids safety and security. They look out for the safety of each and every member of the school from the helping staff to the kids and teachers and deals with the stuff that they find suspicious.

## SCHOOL COMPOUND FENCED & GATED

The school is fenced from all the sides to ensure upkeep of the school compound and to keep the intruders away from entering the school premises. It also helps in providing a safe and secure place to kids where they can roam without having a fear of being abducted or prone to any other harm.

## OTHERS

### 1:15 TEACHER & STUDENT RATIO

Focusing on the quality of education by offering smaller classrooms with fewer students. Every class at Ramagya Roots has a teacher and student ratio of 1:15. This ratio helps in making the classroom more interactive and participative for kids. The motive is to provide better individual attention to every student thereby helping them in their all-round development.

### DAY CARE FACILITY

The school is not just limited to providing pre-school facility but also has the option of daycare i.e. Ramagya First Step for working parents. It is basically an after-school program that helps kids to indulge in activities like art and crafts, sports and other activities of their choice.

### TRANSPORT FACILITY

We also provide transport facility in order to ensure safe transit for kids to school and back to their homes. Each bus has a licensed driver and a transport attendant that is well trained for medical emergencies.

### MONTHLY PLANNED MENU

Planning a meal plan that is healthy and kids will enjoy can be a tiresome job for parents. But at the same time understanding how crucial it is for kids to follow a nutritional diet is also important. We take care of this need of kids having a good diet with a monthly planned menu. We provide them fresh, delicious and nutrition rich food options.

### PARENT TEACHER INTERACTIONS

Parent-Teacher meetings are organised every month where teachers and parents discuss the learning and progress of their kids in academics, sports and other co-curricular activities. These meetings also help parents to have a better insight into their kids' interest in studies and other activities.

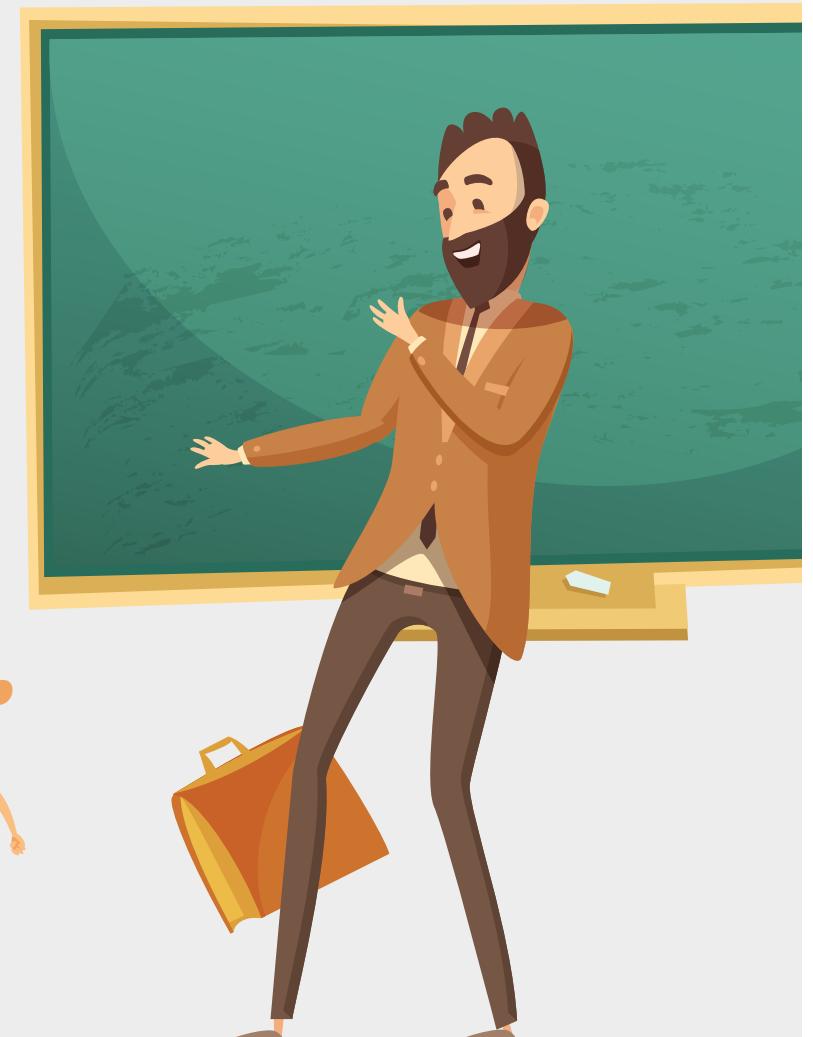

# TEACHER'S TRAINING

“TEACHING IS A VERY NOBLE PROFESSION THAT SHAPES THE CHARACTER, CALIBER, AND FUTURE OF AN INDIVIDUAL.”

Teachers are the pillars of learning foundation. They play the most vital role in the early development of children, and thus we at Ramagya Roots, conduct teacher training sessions every month to ensure the holistic development of children. The teachers are acknowledged about the latest trends and teaching pedagogy. Teachers also need active support so that they can make teaching fun for our children. During the training sessions, the main focus is on the assessment of each & every teacher's skills and requirements and then accordingly work with them to nourish their skills & methods.

To make training sessions easier, we divide them into stages to cover every aspect of teaching like POCSO, Montessori tools, Child Centric Approach, etc.

The best of our teachers are sent to GLOBAL WORKSHOPS for their training on Best International Practices so when they come back they can teach the rest of our teachers about best teaching practices adopted globally for an ideal Childhood development.

# RAMAGYA

## FIRST STEP

Play. Grow. Learn

## RAMAGYA FIRST STEP

A daycare where your child play, grow and learn. We believe in all-round development of children as Education is incomplete if it is restricted just to classrooms. We nourish their young minds, enrich them with the necessary information and tools that will shape their future. At Ramagya First Step kids get to spend time around one another in a supervised, structured and safe environment. Since a child learns best through play, we make sure as children play, they learn to solve problems, get along with others and develop the skills needed to grow and learn. We take care of all the aspects related to the development of children and their holistic growth.

## COMMUNICATION & LANGUAGE DEVELOPMENT

In this area, we support children's learning and competence in communicating, speaking, and listening.

Various opportunities are provided to the little ones in different situations and in a range of purposes, thus helping them in developing confidence and disposition to do so.

We actively encourage the children to communicate with one another & experience a variety of emotions, language, and behavior.

## PHYSICAL DEVELOPMENT

Various fun activities are organized for the kids, so they remain active and interactive both inside and out. Physical Development and Skill Improvement are what we focus on in this program.

Outdoor play keeps children healthy.

We encourage children to understand the importance of physical activities and healthy food. Children are also encouraged about hygiene and personal needs like dressing and eventually going to the toilet independently.

# WHY FIRST STEP?

## EMPHASIS ON SAFETY

High emphasis on children safety and hygiene

## CCTV SURVEILLANCE

We have spacious rooms covered with CCTV Surveillance

## NANNIES

Trained nannies

## DAY CARE

Structured day care programs

## TEACHERS

Passionate and specialized teachers

## MOBILE UPDATES

Instant updates directly to your cell phone

## PARENTS CONCERN

Treating all parents concern seriously and immediately

## DAY CARE ROOM

Male entry strictly prohibited in the day care room

## AFFORDABLE

A cost that won't dig a hole in your pocket

## AIR CONDITIONED

Fully air-conditioned

## 24\*7 MEDICAL SUPPORT

Doctor on call

## OPEN DOOR

Open door policy

## HEALTHY EATING

Vegetarian meals planned by a nutritionist are provided to develop healthy eating habits & table manners

## CHILD DEVELOPMENT

Focus on the overall development of the child which is towards the learning outcomes while providing a variety of educational styles to address multiple intelligences

## DAY CARE ACTIVITIES

We organize tons of activities for all age groups to engage the children. Such activities include sandpit, storytelling, dance, music, yoga and a lot more

## FULL / HALF DAY

Parents can choose from either full day or half day according to their needs

## PERSONAL, SOCIAL & EMOTIONAL

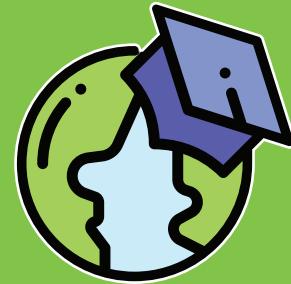

Social activities: In this area we let children play with respective children which enables them to interact and develop their social skills. Also ensuring their emotional well-being and helping them to introspect themselves and what they can achieve & accomplish. Imaginative play allows children to extend their personality, freeing them from real-time constraints. It also helps children to explore and eloquently express their inner feelings through play.

## UNDERSTANDING THE WORLD

In this area, we focus on the importance of understanding the physical world and the community through opportunities to explore and observe the real world.

By offering opportunities to use a range of tools safely, people, plants and objects in the real world and in real-life situations undergo practical experiments and work with a range of materials.

## LITERACY

Picture, rhyme, and storybooks are provided to the children. Under the supervision of the best teachers, they are well guided to understand the best of the book. This includes reading as well as letting them explore books for themselves.

## CREATIVE DEVELOPMENT

Since education just can't be bounded with books, we make sure children learn to paint, play music and be creative. Our children are allowed to do what they want to do. This way, we nurture your little Einstein.

Children always enjoy the messy play so to treat them with what they love we offer painting and basic art and craft, which gives children knowledge of color, texture, and perspective.

“EVERY FACE HAS A  
DREAM TO ACHIEVE.

”
